NEW AND IMPROVED

Celebrating Clean Water in Chipanga with a New Design

We are excited to announce the completion of the Chipanga Village water project! The well provides 26,000+ gallons of clean water each day to 8,920 villagers! People no longer need to use scarce sources of dirty water. This state-of-the-art clean water system was constructed by our new contractor, Edmund. It includes a newly designed water reservoir, a cattle trough and 15 distribution points throughout the village that now have two faucets each, allowing water to be distributed twice as fast! Chipanga villager Anna Samson said, "When clean water finally flowed in our village, it was as if HOPE itself had arrived!" **You can help deliver this same kind of hope to others by partnering with TLP through a tax-deductible donation TODAY! A donation of just \$40 provides access to clean water for an individual for decades to come.**

\$40,000 Matching Opportunity!

WE NEED YOUR HELP!

A very generous donor has offered a \$40,000 match for all new donations. With your help, we would like to get the full match by the end of the year. **GIVE NOW to DOUBLE your IMPACT!**

A commitment for a recurring monthly gift will receive credit for its annual value. For example, a recurring monthly gift of \$50 (\$600 annual) will result in a total of \$1,200 including the matching funds, providing water access for 30 people in a year!

See below for ways to donate directly to TLP. Additionally, you can also support us by purchasing Tanzanian coffee from **True Stone Coffee Roasters** at truestonecoffee.com.

New Additions

Congratulations to TLP staff members Burhani and Ramadhan and their wives on the births of their beautiful new babies!
